Project Proposal: Renewable Energy for a Healthy Puerto Rico
INGL3101-N07

Background

The SDGs are a universal call to action to end poverty, protect the planet and ensure that all people enjoy peace and prosperity.

Between 1990 and 2010, the number of people with access to electricity has increased by 1.7 billion, and as the global population continues to rise so will the demand for cheap energy. A global economy reliant on fossil fuels, and the increase of greenhouse gas emissions is creating drastic changes to our climate system. This is impacting every continent. Still one in seven people lack access to electricity, and as the demand continues to rise there needs to be a substantial increase in the production of renewable energy across the world. Ensuring universal access to affordable electricity by 2030 means investing in **clean energy sources such as solar, wind and thermal**.

The accelerated transformation of our civilization has made it evident that the continuous use of these energy sources is completely unsustainable, not only because of the deterioration of the supply of the raw material, but because of the atmospheric contamination that we suffer from.

Objectives

- People change their ways of energy consume.
- Offer resistance of durability to residences, communities and business
- Make an impact of the ecological conditions of Puerto Rico and the pollution that is affecting us.

Scope

This project will have an emphasis all around Puerto Rico because after Hurricane Maria Puerto Ricans has been affected in all areas and this is a way that will be satisfying for them and keep them safe and prepare if someday another natural disaster occurs.

Timeframe

	Description of Work	Start and End Dates
Phase One	Project Proposal, Video	Oct 9 – Oct 16
Phase Two	Research	Oct 16 – Nov 1
Phase Three	Findings and solutions	Nov 1 – Nov 20

Project Resources

	Description of Resource	Link to resources
Phase One	Template, Promo Video	http://www.undp.org/
Phase Two	Research, Internet	https://www.ucsusa.org/clean-energy/renewable-energy
Phase Three	Essay, Voice Thread, Pecha-kucha	

Project Proposal: [Name of Project]
Course & Section

Key Stakeholders

Students	Yan F. Jimenez / Joselyn Ortiz / Bryan Lebron
Professor	Jesus Lopez
Project manager	Bryan Lebron

Monitoring and Evaluation

We're going to contact our languages partners and share some ideas. Bryan has done the project proposal template. Also we're going to upload the information in the portfolio. All of us will be working together on the rest of the project.
